# General Information

- ❖ **UPCOMING MANSE REPAIRS:** After one of the early winter rains caused water to leak inside the manse, we discovered that the mortar around the roof ridge capping had fretted away and in some areas had completely disappeared. The water which entered through these gaps also caused some damage to the gas heater in the manse which is likely beyond repair. The opinion of local air conditioning tradespeople is that the ducting and heater are at the end of their lifecycle and the most expedient means of proceeding is to install a reverse cycle air conditioner for the lounge & kitchen and two smaller split systems to the two affected bedrooms, the cost of which is between \$6,000 and \$7,500 to install. The roof repairs have been completed at a cost of \$1,600 which has been covered by a generous donation from one of our members. Our thanks to Peter Schmidt for arranging the roof repairs and to Martin Gordon for seeking advice and quotes for the air conditioning work. As the manse is a Parish asset, the matter how we proceed and how the cost is funded will be decided at the upcoming Parish Meeting after service at Wilmington on October 30th.
